SCARBOROUGH Newspaper Audience Ratings Report 2008

WELCOME TO THE 2008 SCARBOROUGH NEWSPAPER AUDIENCE RATINGS REPORT!

As the leading source for newspaper audience ratings in the U.S., Scarborough Research is pleased to share with you our 2008 Newspaper Audience Ratings Report. This desktop guide, also available online at www.scarborough.com, is your source for newspaper print, website and integrated (print and website) audience ratings for 161 papers in 81 markets.

The report is organized by Designated Market Area (DMA®). (Newspapers whose websites have at least 1% penetration in their market, as well as a Sunday print edition, are included in this report.) The 2008 report features more cities and papers than last year's due to Scarborough's local market survey expansion and our return to measurement in New Orleans.

It is our hope that you will use this as a useful reference tool when planning, buying or selling local media. We hope you find value in it, and we welcome your feedback.

ABOUT THE 2008 SCARBOROUGH NEWSPAPER AUDIENCE RATINGS REPORT

This report is a valuable desktop reference on newspaper audience ratings for those involved in the planning, buying and selling of newspaper media. The report highlights audience ratings for printed newspapers, newspaper websites and Integrated Newspaper Audiences in the 81 Top-Tier local markets measured by Scarborough. In order to be included in this report, newspapers need to have a 1% or greater penetration of their weekly printed newspaper (5 Daily, Sunday) and weekly newspaper website(s) within their local market, as well as Sunday edition of their printed newspaper.

SOURCE

The data in this report is from the Scarborough Research Local Market Studies, Release 2 2007 (fieldwork dates: 8/06-9/07). The markets are organized by DMA adult population and include – but are not ranked by – DMA Household Rank. The DMA Household Rank is based on Nielsen Media Research Local Market Universe Estimates as of 1/1/08.

METHODOLOGY

Scarborough Newspaper Readership Measurements At-A-Glance

The Scarborough study is based on a random sample of adults (ages 18+). Scarborough Research employs a two-phase methodology to collect data: a randomly dialed telephone interview followed by a written, self-administered consumer questionnaire and television diary. The newspaper audience information and websites visited are captured during the telephone interview. A Media Rating Council (MRC) accredited media and marketing service, our newspaper data meets the highest data quality standards.

Weekly Print Audience

Adults in the paper's local market who "read or looked into" the daily or Sunday print edition of the paper during the past seven days (5 daily/past Sunday).

Weekly Website Audience

Adults in the paper's local market who visited the newspaper's website(s) within the past seven days.

Integrated Newspaper Audience

Adults in the market who have read the printed newspaper or visited the newspaper's website(s), or did both, during the past seven days. The Weekly Website Audience measurement is used to calculate Integrated Newspaper Audience to be more consistent with the publishing timetable, as most newspapers sell advertising on a weekly or average-issue basis.
